July 2011

Benefits to Landline Telephone Service

9-1-1 Emergency– Help will find you faster with a Landline Phone. With a call to 9-1-1 from a landline phone and emergency dispatch center will automatically receive your exact location– saving time and lives? If you have kids or elderly in your home, is it really worth the risk to go without a landline phone?

Secure Service– Never use your wireless phone to give out personally identifiable information. Did you know some wireless phones use radio frequencies that can easily be intercepted?

Telephone Book Listing– Without a landline phone your number will not be listed in area telephone books and on many online directories.

Quality– Landline phone service offers you the highest quality service. No static and no dropped calls!

Power Outage– Corded landline phone service will work during power outages. Cellular and Wireless systems are not required to provide back up power, so cell phones may not operate during a power outage.

Service Tech Corner

Are other people using your internet connection? Wireless routers that are located in densely populated areas can emit a signal into neighboring homes. If your wireless router's security is not enabled, your internet connection is up for grabs. This also opens your network to a host of problems. This may result in your neighbors stealing your bandwidth, and compromising your security. If you live in a more rural area there is no need for concern.

Visit <http://compnetworking.about.com/od/wirelesssecurity/tp/wifisecurity.htm> for more wireless security tips.
